How to find H-index in Web of Science (WoS)

Login to the UEF Finna and search for the Web of Science (WoS) database. Click Database interface link to open the database.

Figure 1: Open the author search:

Figure 2: Enter the author’s name:
Figure 3: Check the amount of the article groups:

If only one, then click **Create Citation Report**.

If more than one, then click **Article Groups** and follow the instructions given in Fig. 7.
Figure 4: Spot the most recent h-index:

![Web of Science interface showing h-index](image)

The most recent h-index is displayed here.

Figure 5: Search with the variations of the author’s name:

![Web of Science interface for author search](image)

You may also search using variants of the name.
Figure 6: Check the amount of the article groups:

Click here if there is more than one group.

Figure 7: Choose all the suitable records:

Select the desired researcher and click View records.
Figure 8: Create the report:
