

AVAINSANAT:

bio-based resource governance, policy mobility & translation, sustainability

MORITZ ALBRECHT; SOCIO-SPATIAL PROCESSES OF BIO-BASED RESOURCE USE & SUSTAINABILITY

I am a human-geographer specialised on relational aspects of environmental governance. My core expertise is to study socio-spatial processes of bio-based resource policy, management and utilization to evaluate development frameworks, barriers and solutions.

PREVIOUS RESEARCH:

- › EU bioenergy policy design and transformation between Brussels and local implementation.

- › Perspectives on sustainable forest certification in European supply chains.
- › Cross-border management of natural resources.

CURRENT RESEARCH:

Regional bioeconomy cluster development and the role of sustainability.
