How do you know you are learning?

**EVALUATION OF THE CURRICULA AND PERSONAL STUDY PLANS (PSPs)**

A well-designed curriculum enhances the studies. In the PSP, the student plans the studies and follows their progress.

**SURVEYS OF STUDENT WORK LOAD AND TIME CONSUMPTION**

Do the students devote enough time to studying? Learning takes time. Monitoring time consumption has a positive effect on study progress.

**CUMULATIVE LEARNING**

Profound learning produces conceptual change. Knowledge is accumulated in long-term memory during the studies.

**DEVELOPMENT OF STUDENT’S STUDY HABITS**

How do the students study? The student needs guidance during his/her studies and learning processes. For instance, studying in a group enhances learning.

**SUPPLEMENTARY STUDIES AND RECOGNITION / ACCREDITATION OF COMPETENCES**

Competencies and expertise are valuable regardless of where and how they have been attained.

**IOT TOOLS**

These tools are designed either for the teacher and study counsellor or the students. They facilitate, for example, curriculum and PSP work as well as monitoring the student’s time consumption or study progress.

The national Five Years, Two Degrees (W5W²) project surveys and develops these themes. We offer training, consultation, material and network support. Further information: www.w5w.fi
